Contents of Volume 91 2002

Alonso-Mallo I: Runge-Kutta methods without order reduction for linear initial boundary value problems 577

Barrientos MA, Gatica GN, Stephan EP: A mixed finite element method for nonlinear elasticity: two-fold saddle point approach and a-posteriori error estimate 197
Berrone S: Robustness in a posteriori error analysis for FEM flow models 389

Calvetti D, Lewis B, Reichel L: On the regularizing properties of the GMRES method 605

Deckelnick K, Dziuk G: A fully discrete numerical scheme for weighted mean curvature flow 423
Doedel EJ → Engelborghs K
Dörfler W, Nochetto RH: Small data oscillation implies the saturation assumption 1
Dziuk G → Deckelnick K

Engelborghs K, Doedel EJ: Stability of piecewise polynomial collocation for computing periodic solutions of delay differential equations 627

Gallagher I: Mathematical analysis of a structure-preserving approximation of the bidimensional vorticity equation 223
Gatica GN → Barrientos MA
Guillaume P, Masmoudi M, Zeglaoui A: From compressible to incompressible materials via an asymptotic expansion 649

Höllig K, Reif U, Wipper J: Multigrid methods with web-splines 237
Huang J, Wang J, Warnecke G: Error bounds for the large time step Glimm scheme applied to scalar conservation laws 13

Jia R-Q, Jiang Q, Lee SL: Convergence of cascade algorithms in Sobolev spaces and integrals of wavelets 453
Jiang Q → Jia R-Q

Kaltenbacher B, Schöberl J: A saddle point variational formulation for projection–regularized parameter identification 675
Kornhuber R: On constrained Newton linearization and multigrid for variational inequalities 699
Kunkel P, Stöver R: Symmetric collocation methods for linear differential-algebraic boundary value problems 475

Leborgne G: An optimally consistent stabilization of the inf-sup condition 35
Lee SL → Jia R-Q
Lewis B → Calvetti D
Liu J-G → Wang C

Marbán J M, Palencia C: On the numerical recovery of a holomorphic mapping from a finite set of approximate values 57
Masmoudi M → Guillaume P
Maymeskul VV, Saff EB, Stylianopoulos NS: L^2-Approximations of power and logarithmic functions with applications to numerical conformal mapping 503
Micu S: Uniform boundary controllability of a semi-discrete 1-D wave equation 723
Ming P, Shi Z: Optimal $\mathcal{L}^2$ error bounds for MITC3 type element 77

Nievergelt Y: A finite algorithm to fit geometrically all midrange lines, circles, planes, spheres, hyperplanes, and hyperspheres 257
Nochetto RH → Dörfler W

Paige CC, Strakoš Z: Bounds for the least

squares distance using scaled total least squares 93
Paige CC, Strakoš Z: Scaled total least squares fundamentals 117
Palencia C → Marbán J M
Peña JM: On the optimal stability of bases of univariate functions 305
Publisher's Note 195
Pytlak R: Global convergence of the method of shortest residuals by Y. Dai and Y. Yuan 319

Reichel L → Calvetti D
Reif U → Höllig K
Reusken A: Convergence analysis of a multigrid method for convection–diffusion equations 323

Saff EB → Maymeskul VV
Schöberl J → Kaltenbacher B
Shi Z → Ming P
Stephan EP → Barrientos MA
Stevenson R: Nonconforming finite elements and the cascadic multi-grid method 351
Stöver R → Kunkel P
Strakoš Z → Paige CC
Stylianopoulos NS → Maymeskul VV

Wang C, Liu J-G: Analysis of finite difference schemes for unsteady Navier-Stokes equations in vorticity formulation 545
Wang J → Huang J
Wang Z, Wong R: Uniform asymptotic expansion of $J_\nu(\nu a)$ via a difference equation 147
Warnecke G → Huang J
Wipper J → Höllig K
Wong R → Wang Z

Zeglaoui A → Guillaume P
